Dear partners,

We hope this email finds you well.

As previously announced, the Polytechnic Institute of Setúbal will hold the 13th International Week, from 26th to 30th June 2023.

Registration is now open until April 10th 2023 and the draft program can be consulted in the attached document. To **formalize the registration**, it is necessary to fill out this [form](#).

During this International Week, we will discuss the following topics:

- > European Universities
- > Applied research and Innovation and Intellectual Property
- > Future of higher education: Education 5.0 and artificial intelligence
- > Science and society: citizen science and science communication

This International Week will be open to the participation of teachers, researchers, and non-academic staff from International Relations Offices, R&D support services and staff involved in the support of Entrepreneurship and Technology Transfer activities.

Considering the specificity of this year's International Week themes and objectives, we will privilege candidates for training mobility (STT). However, if you would like to lecture in the scope of one of the specific themes we have defined, you can apply for that purpose also. If this is the case, you shall indicate in the registration form the title/theme of your lecture(s) and submit a brief abstract.

Because there are limited places, it may be necessary to make a participants' selection. Until the end of April we will inform everyone who formalize the registration, if the participation is confirmed or not.

Feel free to contact us if you need any additional information (cimob@ips.pt).

If you consider this information interesting for a colleague, please forward this email.

Best regards,
IPS International Team
